Data Dictionary & Terminology

General Information

- **BankName & Ticker:** The legal name of the financial institution and its publicly traded stock exchange symbol.
- **Region:** The overarching geographical operating segment, categorized as either *Americas* or *Europe*.
- **HQCity:** The city where the bank's global corporate headquarters is located.
- **Employees:** The total reported full-time equivalent (FTE) workforce.

Core Financials (in USD Millions)

- **Total Revenue:** The total gross income generated by the bank's operations (including interest and non-interest income) before expenses are deducted.
- **Net Income:** The total "bottom line" profit of the bank after all operating expenses, taxes, and provisions have been subtracted from total revenue.
- **Total Assets:** The aggregate value of all financial resources owned or controlled by the bank, including loans, cash reserves, and property.

Performance & Risk Indicators

- **ROE % (Return on Equity):** A measure of financial efficiency, calculated by dividing net income by shareholders' equity. It demonstrates how effectively the bank uses investments to generate profit growth.
- **CET1 % (Common Equity Tier 1):** A critical regulatory risk metric that compares a bank's core equity capital against its total risk-weighted assets. A higher percentage indicates a stronger safety buffer against financial distress.
- **Net Margin %:** The ratio of net profit to total revenue, indicating how much of every dollar earned translates directly into profit.
- **YoY Growth % (Year-over-Year):** The percentage change in Revenue or Net Income compared to the exact same period in the previous year, used to track expansion or contraction.
- **Financial Health Score:** A custom composite index (0–100) evaluating the holistic strength of the bank. It is calculated using a weighted formula balancing profitability, stability, and growth.
